

Toyota LandCruiser 80 Series Drive Flange

\$77.27

Product Images

Short Description

Genuine OEM spec replacement drive flange to suit the factory Toyota LandCruiser 80 Series built between 04/1994 and 01/1998. Can also be used as a replacement for pre 04/1994 80 Series LandCruisers with the shorter axle splines when fitting the RCV Ultimate CV Axle Set.

Description

Genuine OEM replacement drive flange to suit the factory Toyota LandCruiser 80 Series built between 04/1994 and 01/1998. Can also be used as a replacement flange for pre 04/1994 vehicles with the shorter axle splines when fitting the RCV Ultimate CV Axle Set. When used as a replacement the flange will give around 30% more spline contact resulting in less wear compared to the standard drive flange.
