

## FYRLYT Nemesis 9000 Wiring Harness

**\$159.09**

### Product Images

### Short Description

Wiring harness designed to suit a pair of 250W FYRLYT Nemesis 9000 driving lights.

### Description

Kit contains:

- Wiring Harness
- 2 x 40 amp relays
- 2 x 40 amp fuses
- Switch
- Instructions

The FYRLYT Nemesis harness is built using 4.9mm<sup>2</sup> wire which is the optimum size to guarantee maximum light output, most other looms on the market run smaller gauge wire which will give you reduced output and could leave you disappointed with your FYRLYT driving lights.

NOTE: This harness will only suit a pair of the FYRLYT Nemesis 9000 250W lights, it will **not** work with the FYRLYT 5000 lights.
