Short Description

Alternator Kit 12v Right Hand Top - VE-VF LS2/3

To suit:

- 6.0 LS2 VE/WM V8
- 6.2 LS3 VE/VF V8

Description

Marks 4WD have designed and manufactured this alternator kit to high mount your factory 12v alternator on the right hand top of your 6.0lt VE LS2 or 6.2lt VE/VF LS3 engine.

This setup can work for many different vehicles such as 4wds, hot rods, classic cars and more.

The kit includes brackets for fitment of the alternator, brackets to mount the power steering reservoir and move a coil pack for clearance, idler pulley, power steering reservoir hose, belt and all hardware for installation.

Note: If you are running a VF engine you will need to purchase the VE power steering pump and reservoir to make full use of this kit (VF engines run electronic power steering)

Note: If your engine has non standard pulleys, tensioner or harmonic balancer the belt supplied may not fit - you will have to purchase the correct belt.

Kit contains:

- 12v Right Hand Top Relocation Brackets
- Idler Pulley
- Coil Pack Bracket
- Power Steering Reservoir Bracket & Hose
- Belt
- Spacers
- All fixing hardware

To suit:

- 6.0 LS2 VE/WM V8
- 6.2 LS3 VE/VF V8

Part No. MFK2145
