Short Description

Engine mount kit Chev V8 to Hilux petrol 3Y, 4Y & 3VZ with independent front suspension

Description

These engine mount brackets have been designed to bolt to the engine block and the chassis mounts to be welded onto the Toyota chassis. This bracket kit utilises the Toyota engine mounting rubbers

This kit suits Toyota Hilux and 4Runner vehicles fitted with the 3Y, 4Y and 3VZ petrol engines with independent front suspension.

NOTE: Both Toyota chassis brackets will need to be removed and the new posts welded onto the chassis rails.

Kit contains:

- Left engine bracket
- Right engine bracket
- Left chassis bracket
- Right chassis bracket
