

## ABS Relocation Kit - LandCruiser 80 & 105 series

\$268.18

### Product Images

## Short Description

---

ABS relocation kit to suit part-time 4WD kit

To suit:

- Toyota LandCruiser 80 & 105 series
- Lexus LX450

When ABS equipped live axle vehicles are fitted with a Part Time 4WD kit, the ABS sensor reading from the CV joint becomes inoperable and the ABS warning light is displayed on the dash.

The ABS relocation kit moves the sensor from the CV joint to the wheel hub and operates as per factory specifications

NOTE: This kit is not required if your vehicle has independent front suspension (IFS)

## Description

---

Our ABS relocation kit moves the sensor from the factory position on the CV joint to behind the disc rotor on the wheel hub, this allows the ABS system to operate as per factory specifications.

This kit is a straight forward install for mechanically minded people, our comprehensive instructions are included.

NOTE: This kit is NOT required if your vehicle has independent front suspension (IFS)

### **Kit Contains:**

- Front ABS reluctor rings
- Recluctor mounting boss'
- ABS Brackets
- Shims
- Axle hub dust seals
- Bracket cable mounts
- Welsh plugs
- Bolts
- Washers
