

RANGE INFORMATION

RYCO NANOCEL® RANGE

HIGH EFFICIENCY AIR FILTER

An air filter range with 99.99% efficiency. Ryco NanoCel® reduces dust and contamination by 10x compared to OE. This high-efficiency filtration technology is made for all environments from extremely dry and dusty to water crossings.

PRODUCT SNAPSHOT

Filter Range	Ryco NanoCel® High Efficiency Air Filter
Media	Flame retardant and hydrophobic nano-fibre coated media with patented honeycomb cell pleating construction (Ryco NanoCel®).
Service Interval	Service according to OE recommendations. Depending on your vehicle use, consider service at shorter intervals.

Features & Benefits:

- Cleanable up to 4 times. Can be achieved by applying compressed air (never exceeding 40 PSI) *
- 10x dust reduction, maintaining maximum flow and engine protection.
- Patented honeycomb cell pleating construction with nanofiber media (Ryco NanoCel®).
- Flame retardant – will self-extinguish when exposed to open flames and embers.
- Water resistant – won't compromise functionality in water crossings and other wet environments.
- Incorporates more media than OE equivalent.
- Heavy duty enhanced construction for a physically stronger filter.
- Improved gasket construction for more robust filtration that prevents leaks.

10x Dust Reduction Technology

98.5% (1.5g)

Typical OEM

99% (1g)

Ryco Standard 4x4 Air Filter

99.9% (0.1g)

Ryco NanoCel Air Filter

How Ryco Nanocel® Outperforms the others

- 4x** Cleanable up to 4 times within the regular service interval*
- High efficiency media never compromises flow with better dust and contamination reduction than OE
- Designed for all environments, both flame retardant and water resistant
- Enhanced gasket and frame design prevents seal leaks and promotes cleanability
- New Vehicle Warranty Protection

* NOTE: Cleanability does not mean you can exceed the vehicle manufacturers recommended service interval. Filter must be replaced at service interval or after 4 times of cleaning, whichever comes first.
